

Aris

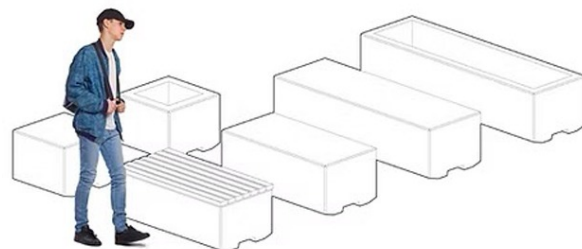

The Aris Modular Concrete Collection

is an exclusive range of integrated concrete seating and planter elements, designed to create an endless variety of compositions within urban furniture design and spatial planning.

With a diverse selection of modular shapes and size options, Aris offers a resilient, low-maintenance alternative to traditional street furniture. Its substantial weight and mass also make it a valuable tool in considerations of building security and pedestrian protection.

A wide range of colour options and material finishes for the concrete base adds a further level of customisation, allowing the collection to seamlessly complement the unique character of any project environment.

In addition, a refined selection of timbers, fixtures, and accessories ensures that the Aris range provides landscape designers with a flexible and expressive toolkit—empowering them to reshape and reimagine urban space for a wide range of practical, everyday applications.

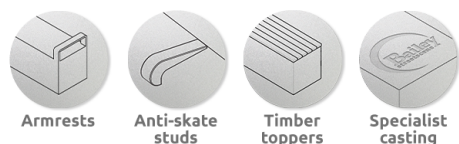

Aris
delivers the ideal fusion of creative freedom and robust, functional design.
