

Fola Seat

The Fola Seat is a bench designed with two steel sheet supports and a seat made of either hardwood or thermo-treated pine slats. The structure is supported by a tubular steel frame and features folded steel sheet ribs. This versatile bench offers a variety of options, including the choice of a backrest made of a wooden plank and steel sheet supports. Users can opt for a configuration with or without a backrest, and there are additional choices for small steel tables or individual steel armrests.

The durability of Fola is ensured by the galvanisation of all metal parts and a coating with thermosetting polyester powder. For added strength and resilience, all fixings are crafted from AISI304 stainless steel. The design also incorporates prepared holes for ground fixing using mechanical dowels (not included). This feature facilitates stable installation, making the Fola Seat suitable for outdoor use. With its robust construction and customisable features, the Fola Seat provides a versatile and long-lasting seating solution.

L: 1750mm x D: 474mm x H: 796mm / Seat H: 440mm
