

Lena Bench

The Lena Bench comes in two main versions, straight and 90° curved. The Lena Bench is available with or without backrest and armrests, composed of two steel sheet supports.

The straight version of the seat is in hardwood or thermo-treated pine or WPC slats, on a tubular steel frame and folded steel sheet ribs, also available with a seating surface made of steel tubes. The curved version seat surface is in steel sheet and C-shaped front beam.

For durability, all metal components are galvanised and coated with thermosetting polyester powder. The fixings are constructed with AISI304 stainless steel. The bench is designed with prepared holes for ground fixing through mechanical dowels (not included).

L: 1573mm x W: 675mm x H: 430mm
